Chemplast bags national awards

CHEMPLAST, the flagship company of Sanmar group, has won two national awards for water management at CII Hyderabad.

The zero discharge units of Chemplast, set up at a cost of ₹27 crore, has not discharged a single drop of treated effluent since in Mettur September 2009 while in Cuddalore and Karaikkal unties, there has been no discharge since inception, said a company release.

This has been possible by pre-treatment of effluents, followed by recycling of 100% good quality water and recovering residual solid waste as raw material for caustic soda production, the release added.
