

Matrix Metals Global is a leading global supplier of Cast steel components for the oil/gas, construction and mining, transportation and military sectors. Matrix Metals started with a modest 150 tons per month foundry in 1998 and has now evolved into an internationally acclaimed multi facility Steel casting business with an installed capacity of 40,000 tons per annum.

Matrix Metals Global comprises foundries in Viralimalai, India and in San Juan Del Rio, Mexico and a sales distribution and technical service facility at Stafford, Texas, USA.

The division began by providing cost competitive foundry services for its in-house requirements. It has grown into a reliable supply chain partner for several global enterprises, offering across the board solutions using its modern foundry, machining and assembly facilities.

Today, Matrix Metals has 3 foundries, 2 in India and 1 in Mexico, a CNC machining facility in India, manufacturing castings using Sand/Shell Moulding and Investment Casting (Lost Wax) in either cast or machine finished condition. It also provides customised semi-assembled or fully assembled finished product solutions if required by customers.
